

PUDU T600

Heavy payload industrial transport robot

The T600 is built for heavy payload industrial logistics, carrying up to 600 kg, twice the T300, to cut the number of trips. The standard version adds a touchscreen and assisted handle for occasional manual use, while the Underride version slides beneath racks to lift and move them for high density automated storage.

Specifications

Payload	Up to 600 kg
Versions	T600 standard and T600 Underride
Battery life	Up to 12 hours
Charging	Approximately 2 hours
Standard version	Touchscreen, ergonomic handle, controls
Underride version	Flat chassis, autonomous rack lifting
Safety	Ground projection warnings, obstacle avoidance
Disaster module	Fire and earthquake signal avoidance
Building integration	Intelligent multi elevator scheduling
